Whoa, there!

You are about to cancel your INR. This cannot be undone.

Back

No, take me back to safety.

Yes, cancel my INR.

1 At any point during the creation of an INR the user can visit their review page and elect to cancel the process.

2 On clicking cancel, the user is presented with a modal warning them that this action "cannot be undone".

3 If the user selects either the "No, take me back to safety" button or clicks on the "X" on the top right of the modal, the modal closes and no action has been taken.

4 If the user decides to proceed with the cancellation and clicks the "Yes, cancel my INR" button, the modal closes and simultaneously the user is taken back to the main "Interconnection List" dashboard.

5 Mobile design increases the width of the buttons for ease of use.
